EDUCATION

Global Institute of Technology and Management

Bachelor of Technology in Computer Science

Gurugram, Haryana

Aug 2023 – Present

TECHNICAL SKILLS

Languages: Dart, JavaScript, Java, C, HTML, CSS, React JS

Frameworks & Libraries: Flutter, Provider (state management)

Mobile/Web Concepts: Text-to-Speech integration, custom animations & gesture-driven UI, responsive layouts, DOM manipulation, client-side image processing (Canvas API)

Tools & Platforms: Git, GitHub, Vercel, VS Code, Snap Lens Studio, MySQL (basic)

PROJECTS

Shrinkit — Browser-Based Image Compressor

HTML, CSS, JavaScript, Canvas API

Live: <https://image-compressor-seven-theta.vercel.app>

Repository: <https://github.com/himanshuchauhan08072004-star/image-compressor>

- Built and deployed a free image compression tool that runs entirely client-side, with no server or upload step, after repeatedly hitting file-size limits on upload forms
- Implemented compression using the HTML5 Canvas API (drawImage + toBlob) with a live, adjustable quality slider and real-time before/after file-size comparison
- Designed and built the full UI from scratch — drag-and-drop upload, side-by-side image preview, and a progress indicator showing percentage size reduction
- Deployed independently on Vercel's free tier with a public GitHub repository and project documentation

Peblo Story Buddy — Kids' Storytelling & Quiz App

Flutter, Dart, Provider, Flutter TTS

Repository: <https://github.com/himanshuchauhan08072004-star>

- Built a mobile storytelling app for client Peblo that narrates stories aloud using text-to-speech and follows up with an interactive comprehension quiz
- Architected app state with the Provider pattern, coordinating async TTS playback events with UI transitions (e.g. quiz auto-appears when narration completes)
- Designed custom animation components from scratch, including a pulsing avatar synced to narration, an elastic-curve transition between story and quiz views, a shake animation for incorrect answers, and a confetti celebration on success
- Delivered a polished, child-friendly UI/UX with attention to motion design and feedback states to keep young users engaged

Web-Based Online Examination System

HTML, CSS, JavaScript, MySQL

- Built a full examination platform handling student login, timed exams, and automated result generation
- Designed the database schema and connectivity layer to store questions, track sessions, and persist scores
- Implemented a countdown timer with auto-submit on expiry to enforce exam time limits without manual intervention

Snap AR Lens — Face Filter

Snap Lens Studio

- Developed an interactive augmented reality lens using face tracking and real-time visual effects
- Optimized rendering performance for smooth execution on mobile devices

CAMPUS LEADERSHIP

Event Management Coordinator

Global Institute of Technology and Management

- Planned and led end-to-end execution of multiple college seminars, cultural programs, and technical events, coordinating logistics, scheduling, and a student volunteer team
- Served as primary point of contact between faculty, guest speakers, and participants for event-day coordination

CERTIFICATIONS

- Agentic AI Workshop — Capabl, Saksham
- Advanced Software Engineering Job Simulation — Walmart Global Tech (via Forage): Advanced data structures, software architecture, relational database design, data munging
- Java Developer Learning Path — MongoDB (Proof of Completion)
